# DETAILS

## Exploring *Communication Theories & Practices* through *International Films*

### *The Films*

### *Theories Explored*

Learners are introduced to a wide range of communication theories that are used in research and workplaces: **Cognitive & Intrapersonal, Social Interaction, Identification/Persuasion, Socio-cultural, Organizational, + more**

### *Important!*

This is not a film theory or film criticism course. We use the dialogue and interactions and themes in the films to discuss the theories explored in the course. The films provide case studies and examples for discussion.
